

IN THE SPECIFICATION:

Please amend the specification as follows:

Paragraph beginning on page 5, at prenumbered line 21, has been amended as follows:

The extendable deck 2 is located above the elevation sustaining plates 121 and 131 and may be extended outside the case 1 through the window 111. The extendable deck 2 has a rear section with one side fastening to the sliding block 122 of the first channeling mechanism 12 and another side has a damper 21 engaging with the gear rack 132 of the second channeling mechanism 13. The rear end of the extendable deck 2 also has respectively a push lug 22 and 23 on two sides to ram against an elastic ~~reed~~ reel A located at the front end of the elevation sustaining plates 121 and 131. The push lug 23 has a binary switch B1 on an inner side corresponding to a latch tongue B2 located on the rear side of the case 1. The front end of the extendable deck 2 has respectively a first and a second pivot seat 24 and 25 fastened to two sides thereof. The first and the second pivot seats 24 and 25 are bridged by a connection deck 26.
